

Micro Bur Range - Synopsis

Introduction:

- Bur range designed for intricate applications

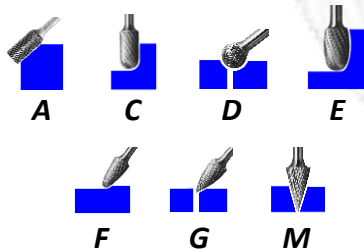

Features & Benefits:

- Micro diameters to suit
 - Precise application
 - High detailed work pieces
- Standard tooth geometry
 - Ensures improved finish
- CNC machined
 - High consistent quality
- Combination of ATA Pencil Grinders with Micro Bur Range
 - Guarantees a smoother grinding operation

Range Details:

- Shapes available

- 10pc Micron Bur kit available

Industries:

- Tool Manufacture
- Precision Engineering
- Jewellery Industry
- Turbine Manufacture

Applications:

- For use in precision applications on a spectrum of materials e.g.
 - Stainless Steels
 - CrNi Alloys
 - Zinc Diecasting
 - Soft Ceramics
 - Titanium Alloys
